**CHANTRY NETWORKS JOINS NETWORK WORLD TECHNOLOGY TOUR TO
CULTIVATE WLAN DEPLOYMENT BEST PRACTICES*****Leading Innovator in Wireless Networking Technology to Discuss WLAN Architectures
Designed to Grow with Your Business***

BOSTON—April 13, 2004—Chantry Networks, the leading innovator of routed wireless networking technology, will go on the road this month to detail the benefits and challenges of various wireless LAN (WLAN) architectures during *Network World's* WLAN Tour. Chantry will join fellow industry influencers to discuss architectural and deployment best practices for ensuring maximum effectiveness in wireless network implementations.

“The rapid evolution of WiFi technologies means even one misstep could result in unrecoverable losses,” said Tom Racca, vice president of marketing for Chantry Networks. “This tour gives us the opportunity to address questions about wireless connectivity options and explain the importance of adopting the right architecture for deploying, managing and securing a wireless network. The WLAN design and management decisions enterprises make today will determine the effectiveness and applicability of their network for years to come.”

At the WLAN Tour stops, Chantry's Luc Roy, senior director of product management, will review the features, benefits, limitations and major differences of the various WLAN architectures available today. Roy will also join a panel of wireless networking experts to discuss how enterprises can integrate their WLAN into their security strategy and leverage their existing wired network infrastructure as the foundation for emerging technologies, such as wireless VoIP.

The tour starts today at the Hyatt Regency Hotel in Chicago. Additional stops include: April 15th at the Hyatt Regency Hotel in Dallas; April 20th at the Doubletree Hotel Bellevue in Seattle; and April 22nd at The Palace Hotel in San Francisco. To view the seminar agenda, please go to: www.nwfusion.com/events/wlan/index.html. To register for the event, please visit: https://www.nwfusion.com/reg/forms/contact_form.jsp.

About Chantry Networks

Chantry Networks is the creator of BeaconWorks, an innovative, IP-based wireless LAN (WLAN) solution. Offering unprecedented scalability and availability, coupled with unique network virtualization features, BeaconWorks overcomes the obstacles inherent in traditional WLAN systems to provide enterprises and service providers with the first economical and practical solution for building seamless and pervasive wireless networks. Founded in April of 2002, Chantry Networks is headquartered in Boston with offices in Chicago, Denver, New York, Washington, D.C., San Francisco and Toronto. Chantry is backed by top-tier investors including Flagship Ventures, Primaxis Technology Ventures, Venture Coaches/ Skypoint Capital and Ventures West.
