**CHANTRY NETWORKS CEO TO SPEAK AT  
MASS TELECOM INVESTORS CONFERENCE**

*Peter N. Vicars to Lay Out  
Chantry's Vision for Wireless Networks*

**BOSTON—May 15, 2003**—Chantry Networks, the provider of BeaconWorks™, the world's first routed wireless LAN solution, will articulate its vision for wireless networking at the 10<sup>th</sup> Annual Massachusetts Telecommunications Council (MTC) Investors Conference today at the Westin Copley Place, Boston. Chantry's CEO, Peter N. Vicars, will recap the successful launch of BeaconWorks, the unique nature of its routed WLAN technology and Chantry's enormous market opportunities.

“Chantry Networks is positioned to take the wireless LAN marketplace by storm,” said Per Suneby, a venture partner at Flagship Ventures. “The BeaconWorks solution uniquely addresses all of the key requirements of large-scale enterprise WLAN deployments.”

Vicars brings to Chantry Networks a highly successful global track record and over 35 years of experience in the networking and telecommunications industry. Prior to joining Chantry, he served as president and CEO of Cayman Systems, Inc., where he led the company from its position as a fringe player to become a leader in the broadband access market. While at Cayman, Vicars was instrumental in acquiring strategic partners and building business relationships, helping the company forge new contracts with major carriers such as Verizon and AT&T and successfully merging the company with Netopia.

The MTC event is one of the region's key technology events and provides a unique forum for investors, analysts, industry decision-makers and the media to get current information about a select group of the Commonwealth's top telecommunications companies. This year's event will showcase 40 telecommunications companies from early stage and mid- to late-stage private companies as well as public companies. Vicars will discuss Chantry and BeaconWorks at 10:45 a.m. today.

Chantry's BeaconWorks, launched on April 21, 2003, has received positive coverage in many media outlets, including *802.11Planet*, *The Boston Globe*, *Communications Design*, *Computerworld*, *EE Times*, *eWeek*, *InformationWeek*, *Mass High Tech*, *Network World*, *PlanetAnalog.com* and *Unstrung*. Its successful unveiling at this year's Network+Interop tradeshow included being selected as a finalist for the “Best of Interop” awards in the Wireless category.

**About Chantry Networks**

Chantry Networks is the creator of BeaconWorks, the world's first large-scale routed wireless LAN (WLAN) solution. Offering unprecedented scalability and availability, coupled with unique network virtualization features, BeaconWorks overcomes the obstacles inherent in traditional WLAN systems to provide enterprises and service providers with the first economical and practical solution for building seamless and pervasive wireless networks. Founded in April of 2002, Chantry Networks has offices in Boston and Toronto, and is backed by top-tier investors including Flagship Ventures, Primaxis Technology Ventures, Ventures West and Venture Coaches.
