**CHANTRY NETWORKS APPOINTS NORMAN MEISNER AS VICE
PRESIDENT OF SALES**

*Company Continues to Tap Networking Industry Veterans
For Senior Management Positions*

BOSTON—May 6, 2003—Chantry Networks, the provider of the world's first routed wireless LAN infrastructure solution, has appointed Norman B. Meisner as vice president of sales for the company. Meisner will be responsible for leading the company's direct and indirect sales efforts and strategic partnerships worldwide. Chantry Networks recently launched BeaconWorks™, the world's first routed WLAN solution, which has been recognized by analysts, media and customers as genuinely unique in a crowded market of switch-based solutions.

Meisner joins Chantry Networks following a long line of sales and business development successes at multiple technology and networking leaders. His expertise builds upon Chantry's current management team, which is composed of industry veterans from Nortel Networks, Cayman Systems and Motorola.

“Chantry Networks has recently launched BeaconWorks, a truly different approach to enabling large-scale wireless access,” said Peter N. Vicars, president and CEO, Chantry Networks. “As we come off of a successful debut at Networld+Interop, we are poised to break-out from the crowded marketplace of switch vendors. Norm—with his industry expertise and proven track record—will be instrumental in Chantry's success.”

Meisner's experience includes senior management roles at AltaWorks, Connected and Net2Net. His extensive background in the networking space comes from additional management roles at Synernetics, a LAN and switching start-up, which was ultimately acquired by 3Com. At 3Com Meisner was responsible for driving \$300 million in business. He has also worked with Ungermann-Bass, Mitre Corporation and Booz, Allen & Hamilton.

“Chantry’s management team, innovative approach to wireless networking, strategic business plan and strong financial backing made this a fabulous opportunity,” said Norm Meisner, vice president of sales for Chantry Networks. “When you combine that with the customer excitement, analyst feedback and overwhelming success at N+I, they are clearly poised to change the wireless industry.”

In January, Chantry Networks announced Peter N. Vicars, former CEO of Cayman Systems as the president and CEO of Chantry. Rounding out the executive team is Co-Founder and Executive Vice President of Product Operations, Brian Collie; Co-Founder and CTO Bob Myers, and Vice President of Engineering Sylvain Louchez. Chantry Networks is headquartered in Boston, with a center of engineering excellence in Toronto.

BeaconWorks, launched on April 21, 2003, has received positive coverage in many media outlets, including: *802.11Planet*, *The Boston Globe*, *Communications Design*, *Computerworld*, *EE Times*, *eWeek*, *InformationWeek*, *Mass High Tech*, *Network World*, *PlanetAnalog.com* and *Unstrung*. Its successful unveiling at this year’s N+I tradeshow included being selected as a finalist in the “Best of Interop” Awards for the Wireless Technologies category.

About Chantry Networks

Chantry Networks is the creator of BeaconWorks, the world’s first large-scale routed wireless LAN (WLAN) solution. Offering unprecedented scalability and availability, coupled with unique network virtualization features, BeaconWorks overcomes the obstacles inherent in traditional WLAN systems to provide enterprises and service providers with the first economical and practical solution for building seamless and pervasive wireless networks. Founded in April of 2002, Chantry Networks has offices in Boston and Toronto, and is backed by top-tier investors including Flagship Ventures, Primaxis Technology Ventures, Ventures West and Venture Coaches.
