

FOR IMMEDIATE RELEASE

DRAGONWAVE LAUNCHES AIRPAIR HIGH-POWER WIRELESS ETHERNET SOLUTION

***AirPair High-Power offers industry leading system gain at rates up to 200
Mbps***

Ottawa, Canada, April 18th, 2005 -DragonWave Inc. a leading global supplier of next-generation wireless networks, announced the availability of the AirPair High Power wireless Ethernet platform. Further enhancing DragonWave's rich IP-based product portfolio, AirPair High-Power enables the highest system gain for high capacity licensed native Ethernet bandwidth solutions on the market. AirPair High Power provides in-service Ethernet and TDM upgradeability from 10 Mbps to 200 Mbps committed full duplex data rates.

"The demand for next-generation Ethernet services is quickly expanding, demanding wireless solutions in a wider variety of environments" said Peter Allen, President & CEO DragonWave Inc. "AirPair High Power addresses this requirement and provides high bandwidth connectivity with the highest system gain available on the market."

AirPair High-Power has already been purchased for a number of customer networks, enabling up to 30% increased reach over the existing AirPair platform while maintaining the native Gigabit Ethernet interface, and unmatched wireless bandwidths. Additionally, AirPair High Power will be deployed to improve link availability or enable reduced antenna sizes in real estate sensitive metro markets.

DragonWave's high power capability provides the AirPair product with a much wider application scope" said Alan Solheim, Vice President, Product Management. "This gives AirPair the best link budgets for similar capacity in the industry."

DragonWave's AirPair product family operates within both licensed and unlicensed radio frequencies of 18-to-26-GHz range, ensuring interference-free performance for customers' traffic. The DragonWave solution provides scalable, ultra-low latency, wire-speed native Gigabit Ethernet connectivity up to 200 Mbps full duplex. The system is extremely easy to deploy and manage, with a full suite

of network management options. AirPair has indoor and outdoor deployment options, and is a highly reliable platform enabling 5 9's service availability.

About DragonWave

DragonWave designs, markets and supports broadband, wireless networking products for service providers and enterprises requiring reliable, predictable, interference-free, high-bandwidth transmission of real-time, IP applications. DragonWave products meet the demands of a wide range of applications as well as delivering a value proposition that enables operators and service providers an "invest as you grow" capability that leverages profitable growth. DragonWave is headquartered in Ottawa, Canada's high-technology capital. The company's Web site is <http://www.dragonwaveinc.com>
